Ognomy
Full Stack Engineer
The complete sleep apnea telehealth solution
- Built by physicians for physicians, to cure 1 billion patients worldwide.
- Architect front-end architecture with React, Typescript, React-Apollo, Redux
- Build iOS APP and android app using React Native, and deployed to Apple App Store and Google PlayStore
- Integrate ZoomSDK and streaming service with virtual care service providers
- Applied TDD, with Unit Testing, E2E Testing and Integration testing
- Implement marketing analytics and monitoring using Firebase Analytics Integration, HubSpot Integration

08/2017 – 03/2019
San Francisco, U.S

Datatron
Software Engineer
- Built the AI/ML automation platform frontend in React.js, Redux
- Built and provided documentation for various modular, reusable, and composable components in React.js to increase developer productivity as well as codebase maintainability
- Refactored, fixed, and pushed new code for various features spanning frontend UI to backend Python Flask and Apache Airflow services to ensure a well maintained, responsive, and flexible codebase as product goals evolve to meet various customer needs and use cases.

- Worked in a team to help vet, support, and troubleshoot pre-deployment, deployment, and postdeployment of the Datatron platform on customer networks.
- Vet and screen candidates via technical phone and onsite interviews.
- Discovered and fixed backend vulnerability that allowed for arbitrary code execution.
